TENTH ANNUAL CATALOG

Landscape Designers
STRAWBERRY ACRES—Wyoming Park
Grand Rapids, Michigan
R. R. No. 8
'It's not a Home-

until it's PLANTED

THE soft, rich beauty of growing trees, shrubs, plants, vines and flowers are necessary, before a "house" is really a home. And the grounds that are poorly or only half planted, only emphasizes the ugly bareness.

Plan Now to

Plant this Spring

Make your grounds a beauty spot this summer. You can do it if you will plan now and be ready to plant this spring. Let us help you. We'll tell you which varieties will give you the effect you want and how to plant and care for them.

Nurseries
STRAWBERRY ACRES
Wyoming Park

THIS catalog commemorates the tenth anniversary of The Arthur L. Watson Nurseries. Starting in a small way ten years ago this organization has grown until today it covers over sixty acres with more than a million trees, plants and shrubs under cultivation. This growth, we believe, is the best recommendation we can furnish as to the quality of our stock and the character of our service.

STOP
Paying High Prices

You can now buy Watson's Hardy Northern Grown Trees and Plants at a Reduction of 30 to 50%

We have decided to pass on to you commissions we have previously paid to agents. This means a big saving to you. It means that you can buy the finest stock for less money than ever before. Some of our stock is even being sold at cost of production to reduce our stock.

VISIT THE WATSON NURSERIES

To get to the Watson Nurseries drive west on Burton Street until you come to the Byron Center Road, then turn left only a few blocks to "Strawberry Acres," on the right hand side of the road — that's the place. It's just a short, pleasant drive. Come out any time.

WATSON'S FREE LANDSCAPE SERVICE

We have a landscape department that will help you select and arrange the proper material to create real beauty and harmony — and the service is free. Fifteen years of experience in studying the habits and growth of different plants, trees and shrubs have given us a knowledge that we will be glad to apply to your problems. Just write us or telephone us (call 602 and ask for 627) and we will have a representative call at your convenience. No charge or obligation.

Order Now While Assortments Are Complete
Ornamental and Shade Trees

Growing trees will add much to the beauty and comfort of a home. By eliminating superfluous varieties we offer herein a well rounded collection of kinds especially adapted to Michigan. Our trees are well spaced in the nursery and develop an abundance of fibrous roots.

Birch, European White (Betula alba)—Very desirable for lawn planting because of the distinctiveness of its white bark.

5 to 6 ft. 2.00

Birch, Cut-leaf Weeping (Betula alba laciniata)—A tall tree with graceful pendulous branches and deeply cut foliage. The bark is white. A superb lawn tree and one universally admired.

5 to 6 ft. 2.20

Catalpa, Speciosa (Western Catalpa)—A medium sized tree of great hardiness. Leaves large and dark green. Flowers in May or June borne in large clusters, white with yellow and purple spots. Is fast growing and makes dense shade.

5 to 6 ft. 4.00

Catalpa, Bungei (Umbrella Catalpa)—Grafted high on a straight upright stem, it makes an umbrella-shaped top without pruning and the large deep green leaves lie like shingles on a roof. Fine for the ornamentation of lawns, parks, cemeteries, etc.

1 yr. head. 2.00

Devil's Walking Stick (Aralia Spinosa)—A small tree with stout prickly stems and compound leaves.

3 to 4 ft. 1.00

Elm, American (Ulmus Americana)—One of the best street trees on all but the driest soil.

1 1/2 to 2 in. diam. 2.00

Elm, Chinese (ulmus Pumilla)—New fast growing elm.

1 yr. head. 2.00

Flowering Dogwood (Cornus Florida)—The large white flowers appear before the leaves are out, making one huge bouquet.

3 to 4 ft. 3.00

Flowering Crab, Bechtels (Malus ioensis bechteli)—Flowers are profuse, double pink, fragrant in June, on a small tree.

3 to 4 ft. 2.00

Flowering Crab, Hopa (Malus ionsis hopa)—One of Hanson's new varieties with small scarlet fruit.

3 to 4 ft. 3.00

Maple, Norway (Acer platanoides)—A low headed tree giving dense shade. It is long lived and one of the best.

5 to 6 ft. 1.75

Maple, Schwedleri (Acer platanoides schwedleri)—Of the same fine growth and habit as the Norway except that the leaves come out bright crimson and gradually change to dark green during the summer.

6 to 8 ft. 4.00

Maple, Silver (Acer dasycarpum)—Of quicker growth than most trees and valuable where immediate shade is desired. Forms a large spreading head and leaves are silvery underneath.

6 to 8 ft. 1.50

Maple, Wiers Cut-leaf (Acer saccharinum wieri)—A very beautiful specimen tree with finely cut foliage and a distinct drooping habit, the pendulous branches often coming to the ground.

6 to 8 ft. 2.00

Ash, Mountain (Sorbus aucuparia)—Noted for large clusters of red berries.

5 to 6 ft. 1.75

Mulberry, Tea's Weeping (Morus alba pendula)—The most graceful and hardy of all weeping trees. Forms a perfect umbrella shaped head with slender willowy branches drooping to the ground. Admirably adapted to small or large grounds.

5 to 6 ft. 2.50

Plum, Flowering (Prunus triloba)—Tree dwarf, branches in early spring covered with bloom.

2 to 4 ft. 1.75

Plum, Purple-leaf (Prunus pissardii)—A hardy decorative small tree with purple foliage, which color is retained throughout the summer. Pink flowers are borne in great profusion in spring as the leaves unfold.

2 to 4 ft. 1.75

Tall Trees Add Height; Broad Trees Add Width
The Arthur L. Watson Nurseries

**Plum, Purple-leaf (Prunus Newport)**—Similar to Prunus Pissardi but richer colored, maturing to still red tinge in the deep bronze-purple. 3 to 4 ft. 2.00

**Poplar Simoni (Populus Simoni)**—Of only medium height, although bushy and rapid growing.

- 8 to 10 ft. 2.00
- 10 to 12 ft. 3.00

**Poplar, Lombardy (Populus nigra italica)**—A tall columnar tree with its towering spire has an individuality of its own. Useful for tall screens and backgrounds.

- 5 to 6 ft. 1.00
- 6 to 8 ft. 1.50
- 8 to 10 ft. 2.50

**Poplar, Bolleana (Populus bolleana)**—A tall narrow-topped tree shaped like the Lombard Poplar but is much more graceful and attractive in appearance.

- 6 to 8 ft. 2.00
- 8 to 10 ft. 3.00
- 10 to 12 ft. 5.00

**Red Bud (Cercis canadensis)**—A native wood and beauty that gives such cheerfulness in spring with its pink pea-shaped flowers, appearing before the leaves. 4 to 5 ft. Each. 1.50

**Paul's Double Scarlet Thorn (Crategus oxyantha splendens)**—The most beautiful of the double flowering Thorns. The flowers are bright scarlet, large full and very double. Makes a splendid specimen for the lawn. Each. 3.00

**Tulip-tree (Liriodendron tulipifera)**—A grand tree of tall pyramidal habit, with broad glossy leaves turning yellow in autumn. The flowers, appearing in May or June are tulip-like in shape and size. 5 to 6 ft. Each. 2.00

**Willow, Pussy (see shrubs)**

**Willow, Wisconsin Weeping (Salix blanda)**—A large tree with slender pendulous branches. Is very hardy and will endure the winters of the far north.

- 8 to 10 ft. 1.75
- 10 to 12 ft. 2.50

---

**Evergreens**

Recent years have witnessed a tremendous increase in the popularity of evergreen plantings. In the winter and summer they add a note of dignity and charm to the home grounds, softening a harsh line here and lending a touch of grace there, to an otherwise monotonous shrub planting. In screen plantings they are unexcelled since they retain their foliage throughout the year.

**The Arborvitae**

**Arborvitae, American (Thuja occidentalis)**—A well known native species of great value forming an upright conical tree of medium size. Valuable for screens, hedges and ornamental planting.

- 2 ft. 3.00
- 3 ft. 4.00
- 4 ft. 5.00
- 5 ft. 7.00

**Arborvitae, Woodward (Thuja occidentalis Woodwardi)**—A hardy dwarf evergreen of good green color adapted for use in foreground and foundation plantings.

- 10 in. spread 2.00
- 12 in. spread 3.00
- 15 in. spread 4.00

**Arborvitae, Pyramidal (Thuja occidentalis pyramidalis)**—Grows in a slim uniform habit, entirely hardy in this section. Well adapted for use in any planting due to the pleasing contrast obtained by both foliage and shape.

- 2 ft. 3.00
- 2½ ft. 4.00
- 3 ft. 5.00

**Arbovitae, Siberian (Thuja occidentalis wareana)**—Dwarf evergreen similar in habit to the Globe Arborvitae although not as compact a type as the latter.

- 10 in. spread 2.00
- 12 in. spread 3.00

---

**The Firs and Hemlocks**

**Douglas Fir (Pseudotsuga douglasi)**—An upright symmetrical branched tree, a native of western U.S. The foliage has a blue and silver characteristic. Useful for specimen planting. 3 to 4 ft. 5.00

**Hemlock, Canada (Tsuga canadensis)**—A broadly pyramidal medium-sized tree of dense growth with rich green foliage. The branches are thickly set and have a tendency to droop at the ends, giving a particularly graceful effect to the whole.

- 2 to 3 ft. 5.00
- 3 to 4 ft. 7.50

---

Never Allow Evergreen Roots to Dry Out
The Junipers

Blue Cedar (Juniperus virginiana glauca)—A very distinct and desirable type. Young growth of silvery-whiteness, changing to bluish-green in winter.

<table>

Deutzia, Lemoine (Deutzia lemoinei) 3 to 4 ft.—Leaves bright green, flowers white in large compound clusters in June. Fine for planting in front of high growing sorts. One of the best. Each...........................75

Deutzia, Slender (Deutzia gracilis) 2 ft.—A species of charming habit. Its slender, drooping branches are wreathed with pure white flowers in May and June. Excellent as a border plant. Each..........................75

Deutzia, Waterer (Deutzia Watereri) 5 ft.—A neat dense bush whose drooping branches are wreathed with pink flowers in early summer.........................75

Forsythia Brotia (Forsythia Brotia) 6 ft.—Has deep yellow trumpet flowers and the earliest. Deep yellow fragrant flowers often appear while snow is on the ground. Slender arching branches and deep green foliage. Each...75

Forsythia, Upright (Forsythia fortunii) 8 ft.—Erect growing, deep green foliage. Golden-yellow trumpet shaped flowers appear in advance of leaves. Each..............................75

Forsythia, Weeping (Forsythia suspensa) 6 to 8 ft.—A graceful shrub with long slender drooping branches. Leaves dark green and lustrous. Very showy golden-yellow flowers in abundance. One of the showiest shrubs. Each..........................75

Golden Elder (Sambucus canadensis aurea) 6 to 8 ft.—A great favorite on account of its bright golden foliage which when planted with other high growing shrubs, forms a marked contrast. White flowers in July in large flat clusters. Each.................................1.00

Honeysuckle, Tartarian Pink (Lonicera tartarica) 6 to 8 ft.—Erect grower whose pink flowers in early June contrast beautifully with its bright green foliage. In summer and autumn its orange berries literally cover the plant. Fine for screens and back grounds. Each.................................75

Honeysuckle, White Belle (Lonicera bella albida) 6 to 8 ft.—A fine new variety having great clusters of fragrant white flowers in early June followed by ‘ropes’ of bright red berries persisting throughout the summer. Each.................................75

Hydrangea arborescens grandiflora (Hydrangea arborescens grandiflora) 4 ft.—One of the most beautiful of all flowering shrubs. The count of being so completely covered with a very large pure snow white flower is often called “Hills of Snow.” Its long blooming period, June to August, and its coming into bloom after the passing of the early spring shrubs makes it doubly valuable. Each.................................75

Hydrangea, Hills of Snow (Hydrangea arborescens grandiflora) 4 ft.—A very popular and showy variety, having an abundance of large panicles of pure white flowers in August changing to pink in September. Should be severely pruned each spring to insure the best bloom. Each.................................75

Honeysuckle, Therapy (Honeysuckle Therapy) 5 ft.—Same characteristics as the above but trimmed and cultivated to a tree form. Each.................................1.40

Hypericum, densiflorum 3.4 ft.—Flowers are bright yellow, one-half inch in diameter in broad, dense, many flowered corymbs. Should be planted in a sunny location. Each.................................75

Japanese Quince (Cydonia japonica) 6 ft.—A spiny shrub with bright green glossy leaves. The large showy red flowers appearing in early May make it most attractive. The flowers are followed by an edible fruit. Each.................................75

Jetbead (Rhodotyphus kerrioides)—4 to 5 ft.—A handsome and distinct shrub from Japan with bright green foliage and large single white flowers appearing the latter part of May. They are an inch or more across and resemble orange blossoms. These are followed by black berries that are retained throughout the winter. Each.................................75

Kerria, Double (Kerria japonica, flore-pleno) 4 to 5 ft.—Foliage deep green and very dense, showy double flowers in white in June. The bright yellow double flowers appear in June. A very graceful shrub. Each.................................85

Lilac, Common Purple (Syringa vulgaris) 8 to 10 ft.—The old fashioned sweet-scented purple lilac found in grandmother’s garden. The best known and the best loved of all the old time shrubs. Each.................................75

Lilac, Common White (Syringa vulgaris alba) 8 to 10 ft.—Same as the above except that the flowers are white. Each.................................75

Lilac, Persian Purple (Syringa persica) 5 to 6 ft.—Small foliage of a rich green color. Branches more slender than the common lilacs and does not sprout from the roots. Large purple flowers in May. Each.................................1.00

Lilac, French Budbed (6 ft.)—The following list of budded French lilacs bloom the latter part of May and are extremely large and fragrant. They vary in color from the finest white to the richest tones of purple. Each.................................75

Mock Orange, Virginal (Philadelphus virginalis) 6 ft.—A magnificent new variety, growing only moderately tall with good foliage and compact habit. The white flowers are the largest, most handsome, and most sweetly fragrant of this variety of the genus. Each...... 1.00

Mock Orange, Virginal (Philadelphus lemoinei) 3-4 ft.—Branches slender and arching. Flowers, large, white, double in large racemes, and very sweet-scented. One of the best dwarf spring-flowering shrubs. Each...... 0.75

Mock Orange, Golden leaved (Physocarpus opulifolius aurea) 8 to 10 ft.—A strong growing shrub with bright yellow leaves in spring and white clusters of flowers in June. A good variety to use in mass planting for color effect. Each...... 0.85

Ninebark, (Physocarpus opulifolius)—Very strong growing, upright shrub, bearing profuse white flowers in June followed by red fruit. Each...... 0.75

Ninebark, Golden leafed (Physocarpus opulifolius aurea)—8 to 10 ft.—A strong growing shrub with bright yellow leaves in spring and white clusters of flowers in June. A good variety to use in mass planting for color effect. Each...... 0.85

Pea Shrub, (Caragana arborescens) 12 ft.—Has yellow pea-shaped flowers in May and June and compound foliage resembling the locust. Fine for back-up rowing plants. Each...... 0.75

Purple Fringe (Rhus cotinus) 8 to 10 ft.—Good as single specimens for lawns or in masses with tall shrubs. The yellowish-green flowers appear in June in loose panicles which become purple and plumelike giving the plant a smoky appearance in late summer and early fall. A slow grower. Sometimes called Smoke bush. Each...... 1.00

Russian Olive, (Eleagnus angustifolia) 12 to 15 ft.—Bright silvery green foliage and silvered branches make this a most desirable shrub in a mass planting for color effect. Each...... 0.75

Snowberry (Symphocarpus racemosus) 4 to 6 ft.—Graceful shrub with slender branches, berries in autumn. Does well in partial shade. Each...... 0.75

Sweet Shrub (Calycanthus floridus) 5 ft.—Flowers are double, chocolate-colored and have a pleasing spicy odor. A very ornamental shrub. Each...... 1.00

Spirea, Anthony Waterer (Spirea bumalda var. A. W.) 2 to 3 ft.—A fine dwarf variety bearing large clusters of rosy-crimson flowers in July, and continuing through the summer and fall months. One of the best for bordering higher growing shrubs. Each...... 0.75

Spirea, Douglas (Spirea douglasi) 4-5 ft.—Of upright growth, leaves narrowly obovate, green above, white woolly underneath. Flowers are deep pink in color and borne in long dense panicles. Each...... 0.75

Spirea, Frobel (Spirea frobeli) 3 ft.—Very similar to Anthony Waterer but grows slightly taller. Each...... 0.75

Spirea, Garland (Spirea arguta) 3 to 4 ft.—One of the finest early blooming Spireas and deep green foliage which persists well into the long double flowers in May and June. Excellent as an informal hedge. Each...... 0.75

Spirea, Thunberg (Spirea thunbergii) 3 to 4 ft.—A distinctive and attractive shrub with its light green dense foliage giving a feathery effect: and in autumn changing to bright red and orange. The pure white flowers in April are masses on the slender arching branches. Each...... 0.75

Sumac, Fragrant, (Rhus aromatica) 2 to 4 ft.—Has yellow flowers in June in clusters along the stem, followed by bright golden berries. It is named after a hermit named the Sufi who was also called the Holy man. Each...... 1.00

Sumac, Cut-leaf (Rhus glabra laciniata) 8 ft.—A very striking plant with deep cut leaves, resembling fern leaves, dark green, turning to a rich red in autumn. Each...... 0.75

Tamarix, African (Tamarix africana) 10 to 12 ft.—Of strong, slender upright growth, with light and feathery foliage resembling asparagus. Small pink flowers appearing in May. Each...... 0.75

Viburnum, Dentatum (Arrow Wood) 8 to 10 ft.—Flattened creamy-white flowers through May and June. Its deeply dentated, dark green, heart shaped leaves turn to rich tones of purple and red in the autumn. Beautiful. Flowers followed by blue-black berries. Excellent for mass planting for foliage effect. Each...... 0.75
The Arthur L. Watson Nurseries

**Hedges, Vines**

**Viburnum, Lantana (Wayfaring Tree)** 8 to 10 ft.—Covers itself with white flowers all of May and June. Its wrinkled and twisted heavy leaves and berries ranging from red to black provides a pleasing combination of colors throughout the summer. Each.

**Viburnum, Opulus (High Bush Cranberry)** 8 ft.—White flowers in flat topped clusters followed by showy clusters of bright red berries that hang until in the winter. Each.

**Viburnum, Opulus Sterilis (Common Snowball)** 6 to 8 ft.—An old time favorite. A grand old shrub with globular clusters of pure white flowers appearing in May. Each.

**Viburnum—Plicatum (Double Flowering Japan Snowball)** 6 to 8 ft.—Handsome foliage and large globular heads of pure white flowers in June. It surpasses the Common Snowball in that its habit is better, foliage handsomer, and blooms whiter and more delicate. One of the most valuable flowering shrubs. Each.

**Viburnum, Tomentosum (Single flowering Japan Snowball)**—Flowers pure white borne in flat clusters in great profusion in June. A very desirable shrub. Each.

**Weigela Lutea**—Yellow twig, purple foliage, yellow flowers in June. Each.

**Weigela, Pink (Weigela roses)** 5 to 6 ft.—The most popular of the Weigelas. A very vigorous grower with deep pink flowers in great abundance in June. Foliage dark green and smooth. Each.

**Weigela, Dwarf Variegated (Weigela nana variegated)** 2 to 4 ft.—Of dwarf habit and possessing clearly defined, silvery variegated leaves; flowers a delicate rose pink in June. Each.

**Willow, Pussy (Salix discolor)**—A popular native shrub. Useful for screen plantings and at the first touch of spring the catkins are in great demand for home decoration. 3 to 4 ft. Each.

**Hedging**

**Vines**

The following are the hardiest and most satisfactory vines for Michigan conditions:

**American Ivy** (Ampelopsis quinquefolia)—A high climbing vine clinging to walls and trunks of trees. The compound leaves consist of five bright green leaflets, turning to a rich red and scarlet in Autumn. Each.

**Boston Ivy** (Ampelopsis veitchii)—One of the finest climbers for covering walls as it clings firmly to the smoothest surface, the overlapping leaves forming a perfect mass of foliage. In summer the color is a deep green changing to crimson and yellow in autumn. Each.

**Bittersweet** (Celastrus scandens)—Handsome glossy foliage and large clusters of beautiful orange crimson fruits that are retained all winter. These sprays of berries are much valued for house decoration in winter. Each.

**Clematis, Jackmanii (Purple)**—Has large, intense, violet flowers in July. One of the most popular varieties. Each.

**Clematis, Paniculata (White)**—A rampant grower giving abundant shade. In August it is actually covered with small star-like white sweet-scented flowers. Is clean and will not litter up the ground or porch. Each.

**Dutchman’s Pipe** (Aristolochia siphon)—A magnificent hardy vine of rapid growth, with large heart shaped leaves and brownish flowers resembling a miniature pipe. As it forms a dense shade it is splendid for archways or verandas. Each.

**Honeysuckle, Hall’s Japan** (Lonicera japonica Halliana)—A strong grower, has dark green leaves that are retained throughout the winter and very fragrant white flowers changing to yellow borne in great profusion in June and occasionally until frost. Excellent for trellises and ground cover. Each.

**Trumpet Vine** (Bigonia radicans)—A high climbing vine with large trumpet shaped scarlet flowers in July. Each.

**Wisteria, Chinese Purple**—A rapid growing vine with good foliage. The pale-blue pea-shaped flowers are profusely borne in May in dense drooping clusters from 7 to 12 inches long. Very showy and exceptionally good for arbors and pergolas. Each.

"Hedging Around a Yard is Like a Frame Around a Picture" [9]
Perennials

We offer a well selected list of perennials, the result of years of experience, comprising the best varieties from the standpoint of hardiness, range of color, and aptitude to local conditions. Since our plants are grown under a sprinkler system, combined with abundant fertility, we are assured of a plentiful supply of vigorous perennials in abundant variety.

**PRICES OF PERENNIALS—(Except Where Noted)**

25c Each — 5 for $1.00 — $2.00 per Dozen

Achillae, Perry’s White—1 to 2 ft. June to September. Pure white flowers one inch across; broad overlapping petals. Very choice for cutting.

Achillae, The Pearl—1 ft. Pure white double flowers all summer. Good for cutting.

Anchusa, Dropmore—4 ft. Tall spikes of beautiful blue flowers all summer. Rough broad foliage. For producing a mass effect of brilliant blue this cannot be surpassed.

Anemone, Hupehensis—1 ft. Large flowers of mauve-rose 1 1/2 in. across, produced abundantly from August until late fall.

Alyssum (Rock Madwort) Saxatile compactum—1 ft. Broad masses of bright yellow flowers in early spring. An excellent plant for the rockery or front of borders.

Anthemis, Sunflower—1 to 2 ft. Flowers in blue, white and yellow. Blooming period covers late spring and early summer months. A good old-fashioned flower.

Asters, Hardy Mixed—3 to 5 ft. White, pink, red and blue, blooming in late summer and fall.

Canterbury Bells—(Campanula Calycanthema)—2 ft. Cup and saucer varieties.

Cerastium Tomentosum (Snow-in-summer)—Low growing having silvery white foliage and abundance of snow-white flowers.

Chrysanthemum, Hardy—The old fashion kind that should be in every garden. Pink, red, white, yellow and bronze.

Daisy, Giant—Large flowers with snow-white petals and deep yellow center, blooming all summer.

Delphinium—(Perennial Larkspur)—3 to 5 ft. All sizes.

Belladonna—Sky Blue.

Bellamosum—Dark Blue.

Chinese—White or Sky Blue.

De Luxe Hybrids—Lavender to Blue.

The Hybrids vary from Lavender to Dark Blue, single and double mixed.

Dianthus, Mixed (Hardy Pinks)—1 ft. Perfectly hardy and flowers continuously from spring until fall. Clove scented and suitable for cutting.

Dicentra, Spectabilis, (Bleeding Heart)—The old fashioned favorite. Its long racemes of heart-shaped pink flowers are always attractive. Each, 75c.

Digitalis, Mixed (Foxglove)—3 to 6 ft. A favorite everywhere. Its stately and picturesque beauty cannot be surpassed.

Funkia, Subcordata grandiflora (Plantain Lily) 2 ft.—Very large pure white lily-shaped fragrant flowers in August and September. Their broad shiny foliage makes them doubly attractive. Does well in shade.

Gaillardia, 2 ft.—The most desirable of the hardy plants. June to September. Dense tufts of drooping leaves producing gorgeous crimson and gold blooms.

Geum, Mrs. Bradshaw—18 in. A splendid new variety, with large double flowers of fiery red, blooming nearly all summer.

Gypsophylla, Paniculata compacta. (Baby’s Breath)—2 to 3 ft. Forms a symmetrical mass of tiny white flowers having a beautiful gauze-like appearance.

Helianthus (Hardy Sun Flower)—1 to 6 ft. Where planted in masses against a back ground of shrubbery they produce a grand effect. Large yellow flowers 4 to 5 in. across are produced in great profusion in late summer.

Hibiscus, Mallow Marvels—4 to 5 ft. A robust plant with good heavy foliage and producing an abundance of flowers of enormous size 6 to 10 inches in diameter. In rich shades of crimson, pink and white. Excellent for the shrub border.

Hollyhocks—4 to 6 ft. The old garden favorite with which every one is familiar, forming perfect rosettes of the most delicate shades of color. Double pink, red, white, yellow and maroon. And single mixed.

See Special Perennial Offer on Back Cover

*Planting Increases Property Values*
Iris Iberis 8-10 in.—A desirable dwarf plant with evergreen foliage which is completely hidden with dense heads of flowers in the spring.

Lathyrus Latifolius (Hardy Sweet Pea)—Not widely known in this country but great favorites in England. They are a climbing plant and are excellent for trellises. We have them in pink, red and white.

Lupinus—These plants produce long spikes of pea-shaped flowers a foot long on stems three feet high. We have them in blue, white and rose.

Lythrum superbum roseum—A splendid plant for the wild garden or for banks of streams, ponds, etc.

Physalis, Francheti. (Chinese Lantern Plant)—An ornamental variety of the Winter Cherry, forming dense bushes about 2 ft. high, producing freely its bright orange-scarlet lantern-like fruits; which, when cut, will last all winter.

Physostegia, Virginica, Vivid (False Dragonhead)—3 to 4 ft. Bears long spikes of deep pink in August. Lasts for a long time after cutting, double golden yellow flowers in late summer.

Platycodeon, Grandiflora. (Balloon Flower)—18 inch June to October. Large Balloon shaped flowers all summer.

Poppies, Oriental—3 ft. Large scarlet cup-shape blooms with purplish-black blotches at the base of the peals, May and June.

Rudbeckia (Golden Glow)—6 ft. Very popular, producing masses of large yellow flowers.

Statace latifolia 1 ft.—Fine for border. Branching sprays of bloom of a purple blue color. These, if cut and dried, will last for months.

Spirea Gladstone—18 in.—Immense trusses of fine flowers as white as snow borne on erect stocks. A fine variety. Each .75

Sweet William—18 in.—One of the oldest garden flowers producing great masses of rich and vari-colored flowers in May and June. Fine for cutting.

Tritoma, Fitzeri (Red Hot Poker) 3 ft.—Very popular on account of its free and continuous blooming qualities, blooming from July to October.

Veronica Longifolia subsessillis (Speedwell)—2 ft. Spikes completely covered with beautiful blue flowers from July to September. Fine for cutting.

Viola, (Hardy Tufted Pansy)—6 to 10 in. The very best edging plant. Will remain in bloom from May to October if plants are sheared several times to prevent the flowers from going to seed.

### Grasses, Hardy Ornamental

The ornamental Grasses can be used with telling effect in borders, large beds, or by the margin of ponds and lakes. They are often used with small shrubs and medium sized trees in wide borders. The Eulalias planted singly on lawns where the soil is deep and rich, take care of themselves and grow very rapidly into large specimens.

See Inside Back Cover for Perennial Special Offer. See Special Rose Offer on Back Cover
Roses

Rose beds should be prepared with considerable care in order to insure a continuous supply of flowers throughout the season. It is advisable to prepare the soil in the beds to a depth of at least two feet. Careful provision should be taken to see that the water does not stand on the beds since roses require good drainage. The bushes should be trimmed and planted so the bud union is two inches below the surface of the ground. Cultivation in the summer and protection of the plants in the winter by hillling the dirt about them besides covering them with litter will go far in improving the quality of bloom and vigor of the bushes.

Each $1.00 6 for $5.25 12 for $9.75 25 for $18.75

"It's Not a Back Yard Without Fruit"
Lawn Seed

In preparing a lawn, after grading is completed, the soil should be thoroughly raked in order to reduce it to as fine a condition as possible, as well as to level it. Sow the seed in the spring or in August or first part of September, using one pound of Watson’s Special Mixed Lawn Seed to from 200 to 300 sq. ft., according to the relative fertility of the soil, light sandy soils requiring more seed than the heavier soils. After sowing the seed it should be raked lightly, then thoroughly rolled. If seeding should be late in the spring, no pains should be spared to give it plenty of water, a thorough soaking every day will not be too much.

Watson’s Special Mixed Lawn Seed—A mixture of fine dwarf, close growing grasses, including white cover, that will produce a neat velvety lawn and permanent sod in a short time. Per lb. .50

White Clover—Per lb. .90

Groziit Brand Pulverized Sheep Manure

Pulverized Sheep Manure is not a chemical stimulant, but is a natural plant food and is the ideal fertilizer to use for the lawn, in the garden, the perennial border, shrubbery beds, small fruit gardens, flower beds, etc. It is safe and dependable. Odorless and free from weed seed and foreign matter.

25 lbs. for $1.00 50 lbs. for $1.75 100 lbs. for $3.00

Barnyard Manure

Well rotted, per 2 yard Load. $8.00

Leaf Mold

Per Bushel. $1.50

Per 1½ yard Load. $10.00

Insecticides

Arsenate of Lead—A chemically accurate combination of Arsenic which is the poisoning agent, and Lead which serves to hold the poison upon the foliage and counteracts possible damage to the leaf itself. An efficient destroyer of all leaf-eating insects which attack trees, shrubs, flowers or vegetables. Per lb. can. .75

All-In-One Powder—It is often necessary to destroy sucking and chewing insects as well as diseases, such as mildew or leaf spot. All-In-One Powder contains fungicide, poison and nicotine. A general purpose dust and very effective. Per lb. can. .60

Nicotine Powder—A highly efficient destroyer of all sucking insects, designed to combat Thrip, Aphis, spiders, etc. Per lb. can. .50

Hand Dusters—A most useful, practical and handy instrument for applying all of the above dusts. Simply but well constructed. In two sizes, $1.50 and $2.00

Imported German Peat

Per Bushel. $1.00

Per Bale (8 bushel) .4.75

When in Doubt Call "WATSON’S"
Our Guarantee

All goods are guaranteed to reach you in good condition; mistakes, if made, will be promptly rectified. Accept shipment, examine and count on receipt and notify us at once should there be any errors, and the carrier as well, if any damaged stock. This guarantee not good unless above requirements are complied with. We do not guarantee continued growth.

Remember, a tree, shrub or plant is a living organism, as much as a cow, horse or man. It breathes, drinks and feeds, and is liable to attacks of disease and insects. At prices we sell, it is impossible for us to guarantee growth or to be responsible for stock after delivery to our customers in good condition.

NON-WARRANTY

While we hold ourselves in readiness, on proper proof, to replace free of charge all trees, etc., that may prove untrue to label, or refund the amount paid, we give no warranty expressed or implied as to description, quality, productiveness or any other matter of any nursery stock, seeds, bulbs or plants we sell.

(Signed) The Arthur L. Watson Nurseries.

SUBSTITUTION

We reserve the right in case we are out of a variety, to substitute another of equal merit when it can be done (always labeling with correct name), unless the party ordering says "No Substituting," in which case we will fill order as completely as we can, and refund balance of remittance.

ORDERS LESS THAN $1

We cannot afford to fill orders of less amount than one dollar, unless, in addition to amount for plants wanted, ten cents is sent.

If it's good shrubs you want, the kind that grow and make a showing, order them from "WATSON"
